**“Harnessing the Potential  
of present and future Carbon Markets”**

**AUSTRIAN JI/CDM WORKSHOP 2010**

**Vienna, 27 to 29 January 2010**

**DRAFT PROGRAMME**

## INTRODUCING THE EVENT

The Austrian JI/CDM Workshop is the annual event organized by the Austrian JI/CDM Programme, which aims at bringing together a variety of stakeholders of the international climate and carbon community. Its strategic timing – right after the Conference of the Parties – as well as the contributing high-level speakers have been key components for maintaining its attractiveness, providing an effective communication platform for international experts in a friendly atmosphere and a nice setting.

The focus of the forthcoming conference will be on:

- **COP 15 in Copenhagen**, the global climate event awaited by all climate professionals, due to its implications on the future climate regime and carbon market, and
- **current market developments and flexible mechanisms** under the Kyoto Protocol, involving national and international authorities, financial institutions, designated operational entities, project developers and other key players.

## INFORMATION ON THE WORKSHOP

For any information regarding the event, the organising team is happy to assist you:

Mr. Martin Gauss  
Mrs. Bianca Gusenbauer  
Mrs. Sabine Schöller
