

**CHINA: JIANGSU QIDONG DONGYUAN WIND POWER PROJECT**

Kyoto Mechanism:	Clean Development Mechanism
Project Category (UNFCCC):	ACM0002 „Consolidated baseline methodology for grid-connected electricity from renewable sources“
Location:	Dongyuan Town, Qidong City, Jiangsu Province
Emission Reductions purchased:	763,000 t CO <sub>2e</sub>

The proposed project consists of the construction and operation of a wind park in the City Qidong, Province Jiangsu. The project proposes to install 67 sets of 1500 kW wind turbines, for a total installed capacity of 100.5 MW. It is estimated that the annual generation of the proposed project will be 206.35 GWh.

The generated electricity will be fed into the North East China Power Grid. The proposed project will annually generate 186,231 tons of CO<sub>2e</sub> emission reductions by replacing electricity generated by fossil fuel fired power plant.

The project will create 118 new jobs during the construction stage and another 18 new jobs during the operating stage.
