

# Freudenau Power Plant

The Danube power plant at Freudenau has been producing clean electricity from hydropower since 1998. It is both the tenth and last hydropower plant in the Austrian Danube region and, at the same time, within the urban district of the metropolis of Vienna.

Detail	Unit	Value
Capacity	MW	172
Annual generation	GWh	1,052
Maximum flow rate	m <sup>3</sup> /s	3,000
Mean gross head	m	8.6
Turbines	x	6 Kaplan bulb turbines
Generators	x	6 Synchronous generators
